Notes & Details

For safe and optimal use, always ensure the meat grinder is properly assembled before operation. Do not exceed the recommended load capacity of 176 lbs per hour to prevent motor strain. Use the food pusher provided—never insert hands or utensils into the feeding tube. Always operate on a stable, dry surface and avoid prolonged continuous use to prevent overheating. Unplug the machine before cleaning or changing accessories, and never immerse the motor unit in water. Clean all detachable parts thoroughly after each use to maintain hygiene and performance. Keep out of reach of children and store in a dry place when not in use.
